OK that answers my question - sounds good.

On Fri, Sep 1, 2017 at 10:55 AM, Oetker, Susan <susan_oetker@fws.gov> wrote:

> Assuming funding and permitting occur in time, we will get real time results from them, although there won't be time for in depth analysis. But we will know where they have found any, how many, and where they have looked and found none. They understand our time constraints and want to get us as much as we can to be used for the listing decision.

Is there any chance these funds can pay for a different portion; e.g., the taxonomic or genetics portion of the study? Proposal attached (can these funds pay for Task 1, 2, or 4; understood 3 is off the table).

Let me know.

Seth

Seth-
Headquarters finally got a response regarding surveys in Mexico, and BLM was adamantly opposed to spending the in Mexico. As there are no written stipulations on the funding, there is very little to go from, but the BLM budget people said this was not going to be allowed.
Sorry,
Deb
